SOC Case Report

Case ID: POM-1 — Test

Severity: Critical

Detection Date: 2025-10-14 17:05:32 UTC

Detection Source: Abnormal DNS Beacon, CloudTrail

Affected Data: Test this is a test summary test test2 test3. Duis posuere urna non ipsum auctor porttitor. Praesent blandit erat ex, quis fringilla elit fringilla quis. In aliquam nisi feugiat, commodo nulla quis, vestibulum felis. Nulla laoreet, lorem sollicitudin tristique fermentum, dui ante ultricies augue, at ultrices arcu mauris non nisl. Nam laoreet metus odio, nec tristique leo pharetra vel. Vestibulum vitae auctor ligula, at tincidunt purus. Integer blandit nec nunc in laoreet. Nulla pretium tincidunt quam. Praesent condimentum pellentesque lorem, quis scelerisque magna tempor vitae. Donec sollicitudin tempor sollicitudin. In rutrum dictum nulla vitae ornare. Vestibulum non quam sit amet nulla tristique volutpat. Vestibulum sodales ante ullamcorper feugiat faucibus. Etiam dignissim maximus nisi et dictum.

Detection Details:

The incident was classified as a Critical severity Privacy Spill, detected via an Abnormal DNS Beacon and CloudTrail logs. The alert is associated with the host 'test123'. The summary notes are placeholder text, indicating a lack of detailed investigative findings.

Incident Timeline:

- **(2025-10-14 17:05:32 UTC)** — Initial detection of the incident.

Triage:

- **Host:** test123
- **Source Name:** Pads (pads-9fc38)
- **User Info:** swimlane_system (System User)
- **Case URL:** [Case Link](#)

Actions Taken:

- **Requested User Information:** An inquiry was made to gather details about the user associated with the affected host to assess their role and potential level of compromise.
- **Quarantined File:** A suspicious or malicious file, presumably the source of the DNS beaconing, was isolated on the host to prevent further execution and lateral movement.
- **Reset User Credentials:** The password for the user account associated with the host was reset as a precaution to invalidate any credentials that may have been stolen by an attacker.

Artifacts:

- **Network/Host:** test123
